Increasing Transparency for the Tolerance Reassessment Process; Availability of Preliminary Risk Assessments for Nine Organophosphates

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This Notice announces the availability of documents which were developed as part of EPA's process for making reregistration eligibility decisions for the organophosphate pesticides and for tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act as amended by the Food Quality Protection Act of 1996 (FQPA). These documents are the preliminary risk assessments and related documents for azinphos-methyl, bensulide, ethion, fenamiphos, isofenphos, naled, phorate, profenofos, and terbufos. This Notice also starts a 60-day public comment period for the preliminary risk assessments. Comments are to be limited to issues directly associated with the nine organophosphates that have risk assessments placed in the docket and should be limited to issues raised in those documents. EPA will provide opportunity for comment on the hazard assessments and FQPA safety factor assessments for the other organophosphates at a later date. Opportunity for public comment will also be provided at a later date for a variety of science issues. Allowing access and comments on the preliminary risk assessments will strengthen stakeholder involvement and help ensure the Agency's decisions under FQPA are transparent, and based on the best available information. The tolerance reassessment process will ensure that the U.S. continues to have the safest and most abundant food supply. The Agency cautions that these risk assessments are preliminary assessments only and that further
